25X1
1. Comment.

As compared with the last reported period the present report indicates that a total of 4,590 cars entered East Germany, i.e. a daily average of 383 cars, as against 292 cars which represents an increase by 25 percent of total traffic. No refrigerator carloads were recorded. Boxcars with undetermined load are believed to have carried grain. A total of 342 such carloads i.e. a daily average of 30 carloads were recorded as against 25 carloads during the preceding period. Incoming coal shipments with a total of 309 carloads increased from a daily average of 13 carloads to 25 carloads. Ore and iron shipments arrived at a rate of 900 carloads (75 per day) and 1,574 carloads (131 per day) respectively. This indicates that the volume of ore deliveries remained constant while iron shipments increased by 50 percent. A total of 150 carloads of lumber, i.e. a daily average of 13 carloads, were recorded.

25X1

- 25X1
2. Comment. As compared with the last reported period eastbound traffic increased by 20 percent with a total of 5,294 cars, i.e. a daily average of 441 cars. A total of 289 cars with uranium ore were dispatched to the USSR. This represents a daily average of 24 carloads against 19 carloads during the last reported period. A total of 98 loaded tank cars, i.e. a daily average of 8 carloads, were dispatched to the East which indicates a slight increase of this traffic. The shipment of 72 newly manufactured express train coaches, 24 refrigerator cars and 64 trucks to the USSR is noteworthy.
